10 Ports Gigabit Managed Industrial Switch

IS108GS-2F

Product brochure

Product Introduction

IS108GS-2F is a 10-port gigabit managed industrial Ethernet switch with 8 gigabit RJ45 ports and 2 gigabit optical ports, especially suitable for application scenarios which it is difficult to provide AC power and want to save the wiring costs. EMC Class 4 protection performance; corrugated high-strength aluminum profile shell, IP40 grade, low power consumption design, anti-vibration DIN-rail installation, operating temperature of -40℃-75℃, can work in harsh environments. IS108GS-2F can also support various network management functions: RUN-Ring (self-healing time <10ms), RSTP, VLAN, QoS, SNMPv1/v2c/v3, IEEE802.1X, SSH/SSL, port mirror, port aggregation,etc. The IS108GS-2F is a reliable solution for intelligent transportation, video surveillance and other harsh industrial environments by its rich redundancy, switching and security management features.
Highlights

Port 6KV lightning protection

• All ports support 6KV lightning protection, power short circuit protection, overvoltage protection and surge current protection features.

AI smart button

• AI Loop Protect: Using the RUN-Ring technology, when the main link of the network transmission fails, the system automatically switches to the backup link, and the fault recovery time can reach as fast as 10ms.

• AI VLAN: Isolating ports 1-8 from each other, so that can suppress network storms effectively and improve network performance.

Powerful application capabilities

• Support 802.1Q VLAN, MAC VLAN, IP VLAN, users can divide VLAN flexibly as needed.

• Support QoS, 8 port queues, support port priority, 802.1P priority, DSCP priority, support SP, WRR, SP+WRR, WFQ priority scheduling algorithm.

• Support ACL, support L2 (Layer 2) ~ L4 (Layer 4) packet filtering function, provide flexible and secure access control policy.

• Supports IGMP v1/v2/v3 Snooping and MLD v1/v2 Snooping to meet the requirements of multi-terminal HD video surveillance or video conferencing.

• It supports the fast leave mechanism and querier of Layer 2 multicast, and supports Layer 2 IPv4 static multicast and Layer 2 IPv6 static multicast.

Full security mechanism

• Completed security authentication mechanism: It supports IEEE 802.1x, Radius, Tacacs+, etc.

• The loop detection mechanism can ensure the stable operation of the network for a long time.

• High security features such as port isolation in VLAN, DHCP-Snooping and IP+MAC+port binding, etc., to further ensure user data security.

• Support multi protections like ARP, IP source and DoS.

• Support declining user access by the port numbers, IP address, and MAC address.

Foredge

Diverse reliability protection

• Support STP (IEEE 802.1d), RSTP (IEEE 802.1w) and MSTP (IEEE 802.1s) protocols to eliminate Layer 2 loops and implement link backup.
• Supports loop protection, root bridge protection, TC protection, BPDU protection, and BPDU filtering.
• Supports relay alarm output functions such as power failure and port disconnection.
• EMC Class4 and anti-jamming capability.

Flexible and convenient management and maintenance

• Support various management methods such as Console, Telnet, and SSH.
• Support simple and efficient WEB management (HTTP, HTTPS, SSL V3)
• Support TFTP mode to upload and download files.
• Support SNMP V1/V2/V3
• Support Hored Apollo cloud platform, which can realize all-round remote operation and maintenance such as automatic device discovery, network topology management, and remote configuration management of devices.
